

About

This agent uses real APIs to perform web research:

- **Tavily:** General web search.
- **GNews:** News article search.
- **Requests/BeautifulSoup:** Web page scraping.
- **Google Gemini:** Information synthesis.

How it Works

1. **Query Input:** Enter your query & API keys.
2. **Search:** Detects if it's news-focused (uses GNews) or general (uses Tavily).
3. **Scrape:** Fetches content from top search result URLs using Requests & BeautifulSoup.
4. **Synthesize (Gemini):** Sends extracted text to Google Gemini, asking it to generate a report answering your query, citing the source URLs.

Disclaimer: Web scraping can be unreliable and may fail on complex sites or sites with anti-scraping measures.
